

# Guide to Sink or Source

## Please note these important details:

- The iStock photos are for EDUCATIONAL USE ONLY
- Many of the files that are pdf (instructions and files for educator) can either be used on an iPad or printed out and used in hard copy format
- In this document you will find links to suggest where you can purchase the necessary equipment for each activity (feel free to shop around and find what works best for your budget)

## Description of files:

- o iStock photos folder – extra photos for educational use only
- o NOAA directions sink source – directions for educator
- o Sink or source resources for educator – files to help educator explain the carbon cycle
- o Sink source label bottom – label graphic on the base of the activity
- o Sink source label top – label graphic on the top of the activity
- o Sink source tags – graphics to use for sink and source cards
- o Worksheet to supplement training video – helps evaluate the preparedness of educator

## Final Version Reproductions

| Description         | Price   | Vendor                                   | Notes  |
|---------------------|---------|--|--|
| Scale               | \$2,650 | Gregory Curci Models                     | Includes six poles.  |
| Card insides        | \$400   | Gregory Curci Models                     | To have the cards produced, please contact Gregory Curci, who will be able to order the card images, and attach them to the cards. There may be an additional cost for this process. |
| Card fronts & backs | \$190   | B.L. Makepeace, via Gregory Curci Models |  |
