

Join the new Ocean Acidification Information Exchange!

Ocean Acidification Information Exchange

The [Ocean Acidification Information Exchange](http://www.OAInfoExchange.org) is a new online community catalyzing response to ocean and coastal acidification through collaboration and information sharing. If you are working on or interested in ocean and/or coastal acidification, come join the conversation! Members of the OA Information Exchange are using the site's platform to swap ideas, exchange resources, and interact with people in a variety of disciplines across many regions. Together, we are building a well-informed community working to respond and adapt to ocean and coastal acidification.

We welcome members of government, tribal and academic research scientists, citizen scientists, experiential and formal educators, NGO employees, marine resources managers, policy makers, concerned citizens, aquaculturists, people in the fishing industry, technology developers, data managers, and others.

A screenshot of the website homepage. The header includes the logo and 'Ocean Acidification Information Exchange' on the left, and 'Member home' on the right. A dark blue navigation bar contains links for Home, Teams, News, Events, What is OA?, Resources, About, and Contact. The main content area features a background image of a diver underwater. The text reads: 'Catalyzing response to ocean and coastal acidification through collaboration & information sharing'. Below this is a paragraph: 'The Ocean Acidification Information Exchange and its members advance understanding of ocean and coastal acidification through collaboration and information sharing to better prepare communities to respond and adapt to acidification.' At the bottom are two buttons: 'Request access' and 'Explore features'.
